SUPPLEMENTARY INFORMATION:

Background

As provided by Congress in the Stevenson-Wydler Technology Innovation Act of 1980, the National Medal of Technology was first awarded in 1985. On August 9, 2007, the President signed the America COMPETES (Creating Opportunities to Meaningfully Promote Excellence in Technology, Education, and Science) Act of 2007. The Act amended Section 16 of the Stevenson-Wydler Technology Innovation Act of 1980, changing the name of the Medal to the “National Medal of Technology and Innovation.” The NMTI is the highest honor awarded by the President of the United States to America’s

leading innovators in the field of technology and is given annually to individuals, teams, or companies/non-profits who have made outstanding contributions to the promotion of technology or technological innovation, or to the development of technological manpower, for the improvement of the economic, environmental or social well-being of the United States. The primary purpose of the NMTI is to recognize American innovators whose vision, creativity, and brilliance in moving ideas to market or in developing of the nation's technological manpower has had a profound and significant impact on our economy and way of life. The NMTI highlights the national importance of fostering technological innovation based upon solid science, resulting in commercially successful products and services.
